

## Flexible Zones – Revenue Range per Area

The table below provides the potential range of total revenue available to Flexible Providers for selling flexibility services in each of the 28 locations. These ranges are published to facilitate participants understanding of the flexibility market and make the tender process as transparent as possible. The ranges are indicative of UK Power Networks planned spend for flexibility to manage network constraints efficiently for the flexibility windows on the Piclo platform.

This table forms part of the ITT suite of documents and should be read in conjunction with the Invitation to Tender and the Framework Agreement to enable Flexible Providers make informed decisions regarding their bidding strategy.

Licence Area	Name	Revenue Range (in £000s)		Max Available Duration of Flexibility Contract (in years)
